

Name _____ Date _____ Period _____

2.5 Absolute Value Equations - Writing Equations

Write an equation involving absolute value for each graph.

1.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

2.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

3.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

4.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

5.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

6.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

9. Tanisha uses the elliptical cross-trainer at the gym. Her general goal is to burn 280 calories per workout, but she varies by as much as 25 calories from this amount on any given day. Write and solve an equation to find the maximum and minimum number of calories Tanisha burns on the cross-trainer.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____

10. A thermometer is guaranteed to give a temperature no more than 2°F from the actual temperature. If the thermometer reads 28°F , Write and solve an equation to find the maximum and minimum temperature it could be.

Solutions: _____

Midpoint: _____

Distance from midpoint: _____

Equation: _____
